

AI-BASED LEARNING PLATFORM

ARTIFICIAL INTELLIGENCE (AI)

- Overall system intelligence and decision making
- Coordinates all modules
- Ensures smart and adaptive learning environment

MACHINE LEARNING (ML)

- Learns from student data (performance, behavior)
- Provides personalized recommendations
- Predicts performance and identifies weak areas

DEEP LEARNING (DL)

- Handles complex data (text, audio, images)
- Automated grading of essays and assignments
- Detects patterns in answers, speech, and engagement

GENERATIVE AI

- Generates study materials, notes, quizzes, and practice questions
- Creates summaries and explanations
- Generates synthetic examples for better learning

LARGE LANGUAGE MODELS (LLMs)

- Acts as an intelligent tutor
- Answers questions in natural language
- Explains concepts and solves doubts
- Supports interactive learning and conversations
